

Oilseeds: World Markets and Trade

Argentina Reopens Door to Soybean Imports

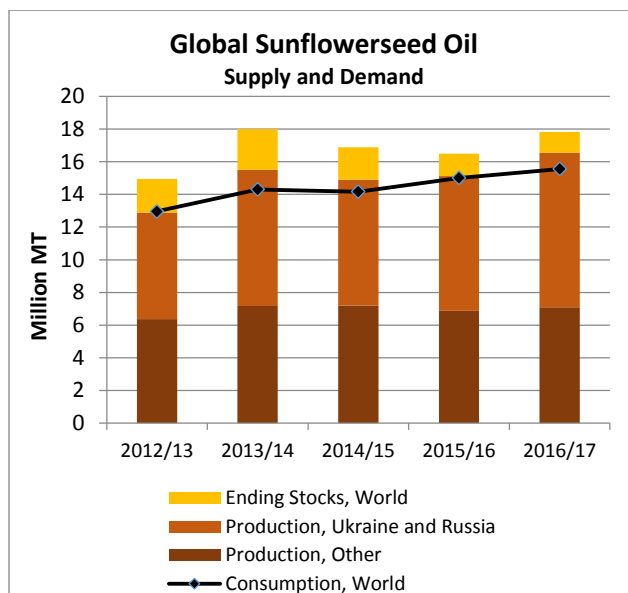

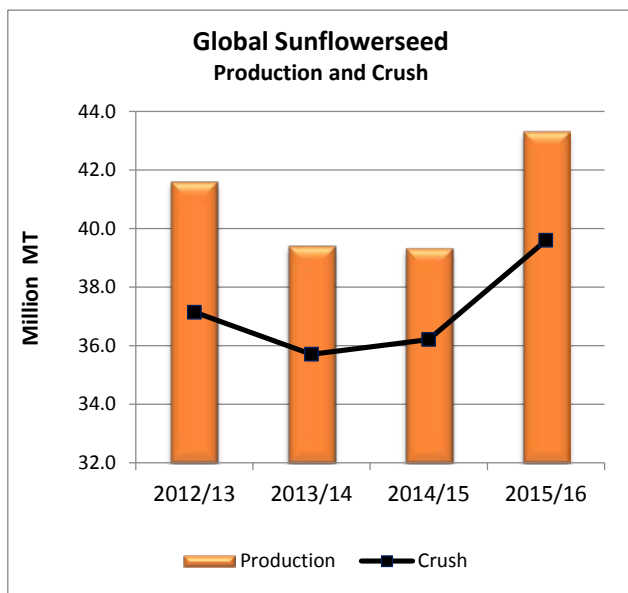

After a long period of inactivity, soybeans are once again flowing into Argentina. Since January of 2016, Argentina soybean imports, arriving mostly from Paraguay, have reached nearly 500,000 tons. While relatively modest in volume compared to peak imports in the late 2000's, it does represent the first imports of any significance in nearly six and a half years. With two months to go in the Oct/Sep year, total imports are forecast to reach near 600,000 tons.

The emergence of soybean imports is in response to legislation that temporarily lifts restrictions on imports for processing. Previously, soybeans could be imported with the resulting products re-exported without incurring any export duties. With processors operating at less than 70 percent capacity, however, the industry lobbied for access to additional supplies which resulted in the lifting of import restrictions.

It is unlikely that sufficient supplies will be available in the near term to push imports to earlier levels as additional processing capacity has been added in Paraguay since the Argentina restrictions were put into place. The current surge in imports of soybeans into Argentina is likely to be a result of blending some lower quality domestic soybeans, resulting from the floods earlier in the year, with soybeans of higher protein content. As a result, forecast import volume in 2016/17 is expected to decline from the current year forecast.

Global Sunflowerseed Crush and Products Output Forecast to Grow in 2016/17

Sunflowerseed production in 2016/17 is forecast to reach a new record of nearly 43.3 million tons, up nearly 4.0 million from the current year. The bulk of the growth is projected in Ukraine and Russia, which accounts for 54 percent of global production. Record supplies, especially in both Ukraine and Russia, are expected to sharply raise crush and boost supplies of meal and oil for export.

Growth in sunflower oil production in the coming year will more than offset expected lower rapeseed oil supplies. Sunflower oil production is forecast to reach an all-time high of 16.6 million tons, up 1.4 million on the year. Exports are projected to surge, with Ukraine and Russia accounting for the bulk of the increase. Global consumption is forecast to grow 4 percent, driven mainly by strong demand in the EU, India, the Middle East and North Africa. Production of sunflowerseed meal is forecast to reach a record 17.8 million tons, up 1.5 million on the year. Global consumption is expected to climb 8 percent, primarily substituting for reduced rapeseed meal supplies in the EU.

A projected global shortage of rapeseed and products in 2016/17 is likely to stimulate additional demand for sunflowerseed products, while leading to increased tightness in global sunflowerseed supplies. Ending stocks are forecast to decline over 11 percent in the coming year, reaching its lowest level since 1999.

OVERVIEW

2016/17

Global oilseed production is forecast higher this month. Larger soybean crop projections for the United States and Paraguay exceeded reductions for India and Ukraine. The rapeseed crop is raised with larger production estimates for Canada and Australia that more than offset reductions in the European Union and Russia. Global sunflowerseed production is also raised this month on larger forecasts for Russia and Ukraine. Soybean imports are forecast higher on projected larger shipments to the European Union and Argentina. Exports are raised on larger shipments from the United States and Paraguay more than offsetting reduced trade out of Ukraine. Global stocks are raised this month. The U.S. season-average farm price is projected at \$9.10 per bushel.

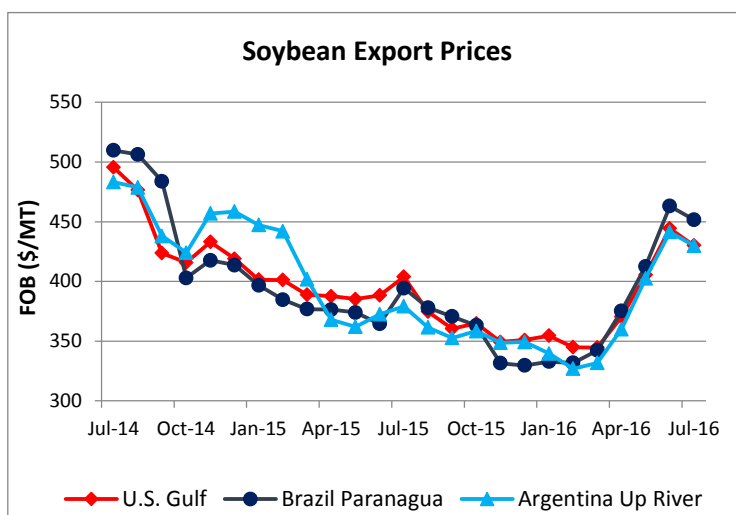

2015/16

Global soybean production is raised this month on a larger harvest estimates for Paraguay, South Africa, and the European Union. Imports are higher on a stronger pace of trade in the European Union, Argentina, Japan, and Thailand. Exports are raised on larger shipments from the United States, Paraguay, and Ukraine that exceeded reductions in Argentina and Brazil. Global stocks are raised this month. The U.S. season-average farm price is estimated at \$8.95 per bushel.

SOYBEAN PRICES

U.S. export bids in July, FOB Gulf, averaged \$430/ton, down \$12 from last month.

As of the week ending July 28, U.S. 2015/16 soybean export commitments (outstanding sales plus accumulated exports) to China totaled 28.6 million tons compared with 29.8 million a year ago. Total commitments to the world are 52.4 million tons, compared with 50.6 million for the same period last year.
